

SCIENCE OF COOK OFF

ATLANTA

25-29 | APRIL | 2016

WORKSHOP ANNOUNCEMENT

The workshop's objectives are to improve our understanding of cook off of energetic materials and the role that heating rate and heating conditions play in determining reaction violence.

Contributions and participation are invited from MSIAC member nations' government, industry, and academia.

Visit the [website](http://www.msiac.nato.int/science-of-cook-off) to register your initial interest in attending the workshop.
